## **DETAILED ACTION**

### ***Information Disclosure Statement***

The examiner considered the foreign patents (European Patent Num. 051, 010; 102,301; and 479,661 filed on 2/19/2003.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8 and 9 recite the limitation "said two cursor strips" in line 3. There is insufficient antecedent basis for this limitation in the claims.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dobreski (5,682,730) in view of Paxton (3,417,864).

Dobreski discloses an installation and method step for manufacturing bags each of the bags having two closure strips (via 22) and a cursor (via 32) slidably mounted on "said two cursor strips", the strips and the cursors being identical between the bags, see for example (Figs.

Art Unit: 3721

2-5); sliding each cursor (32) along the <sup>upper</sup> strips at a respective distance from one end of the <sup>do not</sup> strips (Fig. 4). Dobreski does not disclose that slidingly the cursors in such a manner that the distances are different between every two adjacent and successive bags. However, Paxton discloses a similar bags manufacturing comprising that slidingly the cursors (via closure 15) in such a manner that the distances are different between every two adjacent and successive bags, see for example (Fig. 3) to provide a flexible bag stack (column 2, lines 26-40).

Therefore, it would have been an obvious to one having ordinary skill in the art at the time the invention was made to have modified Dobreski's an installation and method step for manufacturing bags by having slidingly the cursors in such a manner that the distances are different between every two adjacent and successive bags, as suggested by Paxton, in order to provide a flexible bag stack.

#### ***Response to Arguments***

Applicant argues in page 5 and 6 of the arguments that Paxton's reference discloses that the closure is "secured adhesively to the front of each bag" by "spots of adhesive" accordingly, the closure is different from those of the present invention, the applicant went further by arguing that Paxton's patent can not lead one of ordinary skill in the art to modify cursor-type bags in order to arrive at the present invention. The examiner agrees with the applicant that Paxton's reference discloses that the closure is "secured adhesively to the front of each bag" by "spots of adhesive", but the examiner believes that Dobreski's reference discloses closures as the present invention, and since both references are directed to stacking of plastic bags with closure means on them, although they are different type of closures but still directing to same stacking bags, therefore, it would be obvious to modify Dobreski's method and apparatus of stacking bags with

Art Unit: 3721

Paxton's by having slidingly the cursors in such a manner that the distances are different between every two adjacent and successive bags, as suggested by Paxton, in order to provide a flexible bag stack.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
